About us

Quidgest Software Plant, Lda. is a Mozambican company that provides services in the areas of Consulting, Information Systems Development, Databases, Training, Technical Assistance and Cybersecurity.

Vision

A modern, inclusive and sustainable society, supported by appropriate and evolutionary information systems, generated automatically.

Mission

Provide consulting, training, technical assistance services and develop effective and evolutionary information systems with Genio, contributing to the well-being and progress of society.

Genio

Rapid Information Systems Development Platform

Genio is Quidgest's software development platform based on model-driven engineering and Generative AI that we use to support the development of our systems.

High Agility

High Reliability

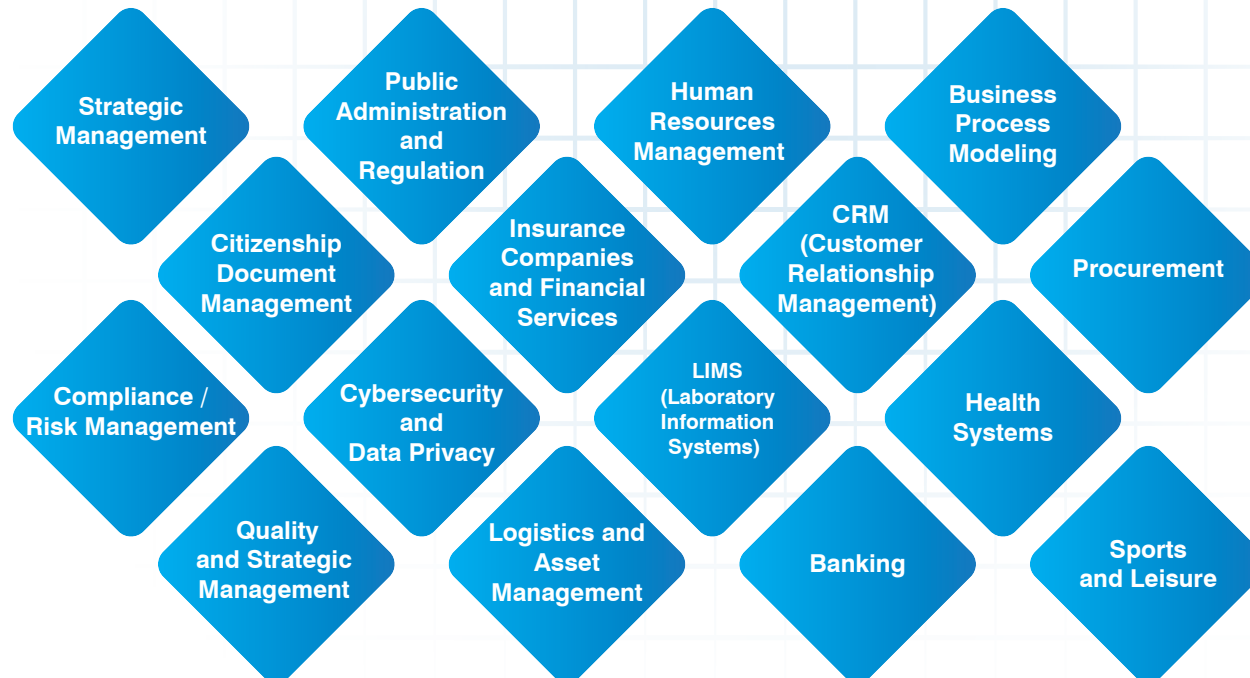

From Process to Resolution

We focus on all our work with the same dedication and attention.

In projects designed according to the specific needs of each organization.

We work in the following areas:

A collection of black chess pieces, including a king, queen, rook, knight, bishop, and pawns, scattered on a white surface. The pieces are arranged in a way that suggests a game in progress, with some pieces standing upright and others knocked over.

The Strategy focused on Excellence

In our approach, we prioritize the definition of strategies and the application of methodologies in all our activities, ensuring evidence of the tasks performed and detailed reports of the results achieved.

We are committed to social and environmental responsibility, a concern that is present in collaborations with AMI (International Medical Assistance) and AMOR (Mozambican Recycling Association), among others.

Quidgest Software Plant Lda. works closely with Quidgest Portugal and the other international units of the Group, aligned with the specific requirements of each project.

Our Team

We are a team of dedicated, professional and responsible consultants, with several successful implementations under our curriculum. We guarantee speed and comprehensiveness, respecting the specific needs of our clients.

With diverse profiles, our consultants share experiences and knowledge, ensuring constant updating, and are always in touch with the latest technology.

Support and Evolutionary Maintenance

We provide support for system updates,
ensuring their stable operation and the
satisfaction of our customers over time.

A large, blue, three-dimensional Quidgest logo is mounted on the side of a modern glass skyscraper. The logo is oriented vertically, following the edge of the building. The building's glass facade reflects the sky and other structures, creating a complex geometric pattern. The lighting suggests a bright, sunny day, with a warm glow on the left side of the image.

Quidgest 

MyERP: Modúlo Gestão de Negócios

É um sistema informático suportada pelas Tecnologias de Informação, é uma plataforma que auxilia empresas a administrar, organizar e otimizar suas operações e processos. O objectivo principal desse sistema é melhorar a eficiência, reduzir custos, aumentar a produtividade e facilitar a tomada de decisões estratégicas.

Principais Funcionalidades do Sistema:

- **Controlo de Stock e Acompanhamento dos pedidos**
Permite fazer a gestão do stock, desde a fase de pedido até ao controlo do Stock dos produtos.
- **Controle de encomendas dos clientes**
Possibilita registar as encomendas dos clientes e dar atendimento, de forma mais eficiente.
- **Venda e facturação**
Permite efectuar vendas, registar o histórico de saída.
- **Controle de acordos contratuais**
Controle de contratos de prestação de serviços conhecidos como avenças.
- **Administração das relações com fornecedores**
Cadastro, avaliação de desempenho e gestão dos contratos com os fornecedores.
